THE **GROWTH**
CONVERSATION 

Transform the discarded into something that reminds us of our responsibility to future generations

We will use art concepts and art forms to explore our view on consumption and the concept of sustainability as a passage to more balanced lives and organisations

Objectives

- An introduction to Eco-art. A walk-through "Look, See, Wonder"
- Exploring ways in which old things can be used in a new way
- Understanding the impact of choice
- Creating memories with momentum
- Tying this new knowledge and thinking to organisational outcomes

Learning outcomes

- Learn to critically look at art, and at the world around you
- Explore with each other the real cost of consumption.
- Thinking beyond the bin
- The outcome of the workshop is to create a memory with momentum, connecting the expression of your commitment to sustainability in a piece of art that can be mounted somewhere for everyone to see
